

Cooler Days, Water Less!

When it rains, save even more...

Western would like to remind you that with cooler temperatures, your landscapes require less water and when it rains, you could turn off your irrigation system for several days. These simple tips will save you water and money.

Quick note: Western will be relying on stored water supplies during annual maintenance on major water facilities, Jan. 14 - 18.

We've prepared with plentiful water storage in our reservoirs and extra water secured from other agencies. If temps heat up and reserves get low, we'll keep you posted. To learn more about Western and your water, visit wmwd.com.

Cuando el tiempo esta frio las plantas necesitan menos agua y cuando llueve apague los aspersores. Esto le ahorrará agua y dinero. Para obtener más información, visita wmwd.com.

**Questions? Please call Western at 951.571.7100.
Thanks for cutting back on cooler days.**
